

Reynobond[®]
Architecture

Creativity requires passion.

For outstanding projects, you need a partner, who approaches his task with the same passion like you do. Whether it involves the development of an innovative paint system or services, such as customised colours, even in small quantities – you can always rely on Reynobond[®] Architecture.

The Children's Museum is an example of the use of aluminium composite material with our high-tech DURAGLOSS[®] 5000 coating. The colours were specifically developed for this project. When may we prove our commitment for your project?

BBA approved

Short delivery times, all colours and the most attractive surfaces of up to 2000 mm, also in small quantities.
