Success**

Reynobond®
Architecture

**Reynobond® XXL – the first 2000 mm wide
composite aluminium panel.**

It opens up exciting new design possibilities, guarantees optimum material utilization, and you can combine Reynobond® XXL perfectly with other 2000 mm wide façade materials.

One example is the new Airbus administration building in Toulouse, whose façade is covered with 10.000 m² Reynobond® XXL. Simultaneously, a further innovative Reynobond® Architecture feature came to bear: DURAGLOSS® 5000, a high-tech coating with exceptional properties, numerous surface options, and excellent durability.

Larger,
faster, better:
Reynobond® XXL!

Simply ask for our free booklet with further information!
