Reynobond® XXL

The established format
for creative designs

With Reynobond® XXL we offer you aluminium composite panels in the ideal width for further processing. Excellently suited for digital printing or photo reproduction, screen-printing, application of adhesive films, and post-painting using the liquid spray technique. But width alone is not everything. With 2000 mm wide Reynobond® XXL you get top quality from the international market leader, you can choose from attractive surface finishes, and you always have access to our know-how.
