Wood-Design: The creative alternative

With the first aluminium composite panels in a Wood-Design, you benefit from all the factors that make Reynobond® Architecture stand out: top quality, low weight, the fabrication of 3D elements, high durability against environmental influences and perfect service.

Our composite panels with Wood-Design finishes are available in three standard colours and can be matched to custom colour specifications as well. With our exclusive DURAGLOSS® 5000 coating, offered with up to a 20 year warranty, they retain their premiere elegance over the long term and guarantee an exceptionally low maintenance.
