

**Reynobond®**  
Architecture

# World Record!

## Reynobond® Architecture

With approximately 290,000 m<sup>2</sup> of floor space, the ASPIRE Sports Dome in Qatar is the largest enclosed sports facility in the world.

The building, designed by Roger Taillibert, forms the centre of Qatar Sports City, a high-tech sports park in the middle of the desert.

The impressive 46 m high roof with a 250 m span was clad using Reynobond® Architecture Aluminium Composite Panels from Alcoa Architectural Products. 110,000 m<sup>2</sup> of Reynobond® Architecture panels finished with PVDF 70/30 coating was used for the project. The simple processing, the top quality appearance, and above all else the high weather resistance were clear arguments for Reynobond® Architecture.
