

Reynolux[®]

Aluminum Wall Panels and Flat Sheet

Reynolux[®] aluminum wall panels are protected by Colorweld[®] 500 coatings. This newly enhanced formulation, considered the premier architectural coating for metal, exhibits outstanding color and gloss retention, improved hardness and durability. It is backed by a 30-year warranty. From 2- and 3-coat (XL) systems to metallic and mica finishes, Alcoa Architectural Products can produce virtually any color and provide consistent color matches with Reynobond[®] Aluminum Composite Materials.

Performance & Personality

Enduring Strength

Available in a variety of profile and flat sheets to meet application and performance needs.

Perfectly Complementary

Reynolux panels can be easily combined with Reynobond to create striking design and contrast in the textures while assisting budgets.

Enhanced Offerings

All Reynolux color offerings consistently match our Reynobond ACM 0.040 Standard Stocking Gauge.

Dynamic Looks

Installed horizontally or vertically for dramatic visual effects, delivered unpainted or with our premium Colorweld 500 finishes.

Extreme Durability

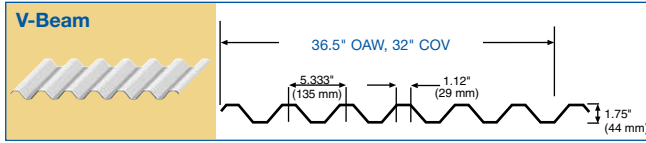

Decrease building façade maintenance costs with the durability of coil-coated metal cladding, ideal when a high-quality, consistent image is as important as adhering to budget constraints.

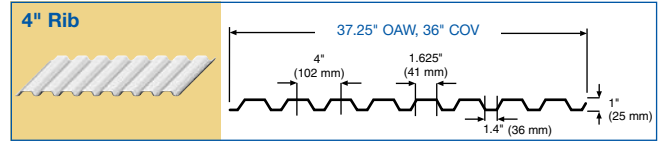

Dedicated to your Success

Profiled Reynolux® aluminum wall panel specifications

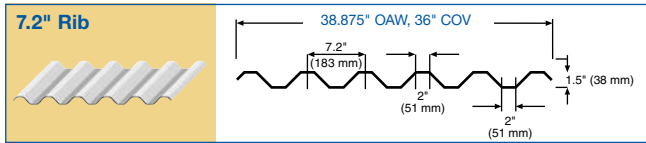

Aluminum wall panels are available in 3000 Series Alloy, Smooth or Stucco embossed, 0.040 Standard Stocking Gauge. Diamond embossed is standard on Rainlock® Rib. Flat sheet is available in standard colors for all profile products.
