

Reynobond® Architecture

Nature. Now available in aluminum.

At first glance you'd swear it's really mahogany. Or granite. Or copper patina. Reynobond® Design Line is a breakthrough line of Colorweld® DL paint finishes so realistic they're virtually indistinguishable from nature's own creations. Each finish provides environmentally sensitive architects with the ability to incorporate eco-friendly, cutting-edge materials without sacrificing style or quality. It's another example of Excellence in Innovation from Alcoa that can help you make an impact on our world.
