

**Reynobond®**  
with KEVLAR®

See for yourself at [reynobond.com/kevlar](http://reynobond.com/kevlar)

Reynobond® with KEVLAR® combines the light weight and flexibility benefits of Reynobond with the impact-resistant strength of KEVLAR®. It stops hurricane-propelled debris in its tracks. And since this innovative system eliminates the need for heavy backer materials and reduces on-site labor costs, it protects your budget as well as it protects your building. Visit our website today to see how Reynobond with KEVLAR® stands up to Miami-Dade testing requirements. It's footage that really makes an impact.
