

## ALCOA ARCHITECTURAL PRODUCTS PROJECT REPORT

**Project** Centro Comercial  
Multiplaza del Este  
*San José, Costa Rica*

**Architect** Avy Aviram  
*San José, Costa Rica*

**Panel Fabricator/  
Installer** Alucom S.A.  
*San José, Costa Rica*

**Panel Type** Reynobond® ACM PE core  
**Quantity** 16,146 square feet  
**Color** Champagne Metallic

**Panel Type** Reynobond® ACM PE core  
**Quantity** 1,615 square feet  
**Color** Program Red

The design for the Centro Comercial Multiplaza del Este, a shopping and entertainment complex, called for a marriage of the historic and the modern to illustrate the concept of a changing Costa Rica. The result is a striking combination created through the juxtaposition of Reynobond ACM with old and original materials.

Reynobond ACM was specified for its sharp, clean-cut, thoroughly modern look that works wonderfully in contrast to the old brick, mosaics and color concrete floors. Alucom S.A. of San José, Costa Rica, fabricated 16,146 square feet of Reynobond ACM PE in Champagne Metallic with a CW300XL finish and 1,615 square feet of Reynobond ACM PE in Program Red with a Duragloss® finish into panels used on the exterior and interior walls, column covers, elevator wraps and decorative accents.
