

Valve Extension for 24.5 x 8.25 98367 Dual Application

Alcoa Wheel Products introduced the 98367 24.5 x 8.25 forged aluminum wheel as a replacement for the 98364. This technical bulletin serves as notification that the valve stem extension stabilizer kit, part number 864392 (containing part numbers 008864 and 00392) designed for the 98364 is not applicable to the 24.5 X 8.25 LVL ONE™ 98367. This is due to the larger hand hole design. In dual applications, the recommended replacement is the plastic valve extension part number 00352. This information is summarized in the table below.

Alcoa Part Number	Valve	Valve Extension in Dual Application	Valve Stabilizer	Valve Stem Extension Stabilizer Kit
98364	TR555D (TR545D OPTIONAL)	00392	008864	864392
98367	TR555D (TR545D OPTIONAL)	00352	N/A	N/A

If you have any questions regarding the correct accessories needed for your application, please contact an Alcoa Sales Representative or call 800.242.9898.
