

# Alcoa 14" Wide Base Lightweight Wheel

## Now the lightest 14" wide base wheel in the industry!

Alcoa's known for innovation in wheels, and this wheel is no exception. Each of these 14" wide base wheels utilizes LvL ONE® technology to reduce the weight and optimize performance. At 58-pounds, it's lighter than the nearest aluminum competitor in its wide-base class.

## Less weight, better fuel economy and more payload

- Weighs significantly less than a comparable steel wheel

## Strength you need, strength we provide

- Load rated to 12,800 lb (5805 kg)

## Added advantages

- Available in 0", 1", and 2" offsets to fit all axle types
- One piece forged strength
- No painting, lower maintenance costs
- True cool running extends tire and brake life
- Over 60 years of wheel experience
- Backed by our five year limited warranty

# WHEEL SPECIFICATIONS

Alcoa aluminum disc wheel mounting dimensions are consistent with SAE Recommended Practice J694 June 2007. Part numbers listed in chart below ending in zero have a brush finish. Polish finishes are indicated by changing the last numerical digit of the part number to one of the following. For mirror polish on the outside only, the number is "1". For clean buff finish on both sides as applicable, the number is "7".

## CLASSIC TUBELESS WHEELS (Round Hand Holes)

10 Hole, Hub Pilot Mounting System – 285.75mm Bolt Circle, 220.1mm Hub Bore Forged Aluminum Wheel

Part Number	Wheel Description	Maximum Wheel Load in Lbs.	Wheel Wt. Lbs.	Mounting Hole Diameter mm	Offset		Maximum Inflation PSI- Cold	Valve Stem	Available Finishes
