

## Alcoa Dura-Bright®/Dura-Flange® Wheels

Alcoa is pleased to expand the line of forged aluminum wheels for buses and transit vehicles. There are 14 part numbers available of the Dura-Bright®/Dura-Flange® (DD) wheels which feature the combined treatments of the Dura-Bright® with XBR® Technology **and** Dura-Flange® rim protection on the same wheel. DD wheels never need to be polished, and clean with just soap and water for a long-lasting, beautiful shine. This patented surface treatment will not chip, crack or peel and prevents filiform corrosion and discoloring, even with exposure to oxygen, humidity, moisture and corrosive compounds, such as road deicing chemicals. In addition, this same wheel is processed with a proprietary treatment on the wheel rim area to provide wear resistance against tire wall flexing, significantly extending wheel service life. Designed for stop and go, heavy load applications prone to shifting, the Dura-Flange® wear protection reinforces the wheel bead area and prevents rim wear.

Together the combined options of Dura-Bright® and Dura-Flange® deliver the optimal performance and ease of care, for significant savings in time that allows fleet maintenance teams to focus on other matters.

Select from the following Dura-Bright®/Dura-Flange® (DD) wheels:

- 883363DD - 22.5 X 8.25 Polished Finish (Bus Mount)
- 883610DD - 22.5 X 8.25 Brushed Finish (Bus Mount)
- 883613DD - 22.5 X 8.25 Polished Both Inside and Outside (Bus Mount)
- 883640DD - 22.5 x 8.25 Brushed Finish
- 883641DD - 22.5 x 8.25 Outside Polish
- 883642DD - 22.5 x 8.25 Inside Polish
- 886510DD - 22.5 x 8.25 Brushed Finish
- 886513DD - 22.5 X 8.25 Polished Both Inside and Outside
- 886520DD - 22.5 x 8.25 Brushed Finish
- 886523DD - 22.5 X 8.25 Polished Both Inside and Outside
- 893640DD - 22.5 X 9.0 Brushed Finish
- 893641DD - 22.5 X 9.0 Polished Outside
- 893642DD - 22.5 X 9.0 Polished Inside
- 893643DD - 22.5 X 9.0 Polished Both Inside and Outside
