

ALCOA WHEELS

Light, *strong,* *beautiful*

Made of forged aluminium, Alcoa wheels are not only the lightest and strongest on the market, they also have a handsome shiny finish that can't be beat.

Alcoa wheels keep their shine without coating. Simple maintenance with ALclean and ALpolish will keep your wheels gleaming like new, year after year!

When it comes to finish, you can choose between glittering "Mirror Polished" and the more economical alternative, lustrous "Diamond Brite".
