

12 Really Important Things You Can Do

Topic:

Global Warming/ Greenhouse Gas Emissions

Check out the following website which is designed to explain climate change to kids:
<http://tiki.oneworld.net>. It's bright, user-friendly and very informative.

Have a good look around this website. You will find lots of interesting things that kids (and adults) will really enjoy and can learn a lot from. You will even find a Time Travel Machine!

Read the section entitled **12 Really Important Things You Can Do to Help Stop Global Warming**. Your job is to try to convey this information to a bunch of younger students – you choose the age group.

Write a speech; develop a powerpoint presentation; brochure; song; or anything that you want to successfully get this information across.
