

Build a Jumbo Jet

Well, you don't actually get to build one but you do get to start a campaign to get people to save enough cans to build one. This is your chance to **think big!** Australia still throws away over a billion cans a year – that's a thousand million cans! You could build 200 jumbo jets with that much aluminium. Start a 'Build a Jet' campaign. If you do the maths you will see that it takes the equivalent of five million cans to build a jet. So that is your goal.
