

Recycling Instructions

Topic: Recycling

Go to the website below to find out about the recycling process for aluminium:

http://www.alcoa.com/australia/en/info_page/pots_recycling.asp

What You Need To Do:

Your task is to read about the recycling process, then put it into your own words as a set of instructions. When writing information into your own words, it is best to read all the information, jot down some notes and then put the original piece of information away. That way you won't be tempted to have a peek and start copying word for word.

Extension/Alternatives

Present your instructions as a series of cartoons.
