

Design a car of the future!

Topic: Rolling

What You Need To Do:

Think forward to the year 2020. You work for a car manufacturing company that sees itself as the leader in environmental motoring.

Brainstorm a list of aspects that must be considered. Below are a few questions, just to get you started:

- What type of vehicle is it?
- How big is your car?
- What type of fuel does it use?
- What is your car made from?
- What does it look like?

When you have finished your list, show it to someone else to make sure you haven't forgotten anything.

Now – get designing!

Extension/Alternatives

- Present your design to the class.
- Make a model of your car.
