

# Tool & Product Update

## Nose Assemblies for 506 and 507 H.I.T.

Nose Assemblies used on Models 506 and 507 Installation Tools are being shipped with two (jaw follower) caps. The shorter of the two caps is for use with older pistons and tools. The longer cap is for use with current pistons and tools. (The current pistons have a deeper counterbore in the end of the piston rod to accept the maximum length pintail at minimum grip without loss of tool stroke).

As shown in the table, there are three ways to determine which cap to use:

1. By tool serial number.
2. By Piston and O-ring Assembly number.
3. By measuring the "D" dimension.

H.I.T.	SERIAL NUMBER	PISTON & O-RING ASSEMBLY	D DIM.	NOSE ASSEMBLY	JAW FOLLOWER CAP
506	WITHOUT SUFFIX LETTER	106633	9/32	99-725	102881 (SHORT)
	WITH SUFFIX LETTER Z & ABOVE	110250	1"		110356 (LONG)
507	WITHOUT SUFFIX LETTER	106635	17/32	99-760 99-760-2	104411 (SHORT)
	WITH SUFFIX LETTER W & ABOVE	110252	1-11/32		99-822
