**Electrical Power Supply  
for  
Model 940 Hydraulic POWERIGS®**

The electrical power supply required for the Model 940 Hydraulic POWERIG is:

115 volts ( $\pm 10\%$ ), 50/60 hertz, single phase, alternating current.

The circuit supplying the electrical power must be fused with a 20 ampere minimum - 25 ampere maximum, dual element fuse (slow blow).

Gasoline powered - portable generators must be rated 3500 watts (minimum) continuous duty.
