

Tool & Product Update

Model 911 POWERIG® Hydraulic Unit Engine Replacement and Repair Instructions

Model 911 (gasoline operated) is obsolete and no longer available. The Model 911 is replaced by Model 941 POWERIG Hydraulic Unit.

Model 911 Engine Part Numbers 112226 (Tecumseh P/N TVM-140 70358K) and P/N 106391 (Tecumseh P/N's V40-50114F; V50-60142G; V60-70292H) are obsolete and no longer available from Huck. A replacement engine may be purchased from a Tecumseh engine dealer.

Use the following procedure when replacing Model 911 engines—all models.

1. Contact a Tecumseh dealer. Purchase engine #806704. This engine is equipped with Electric Starter (12 volt) #33606.

Note: If electric starter #33606 is removed, replace with Baffle #33013 and Screw #650760.

2. Request the dealer to remove standard Crankshaft #34877 and replace it with special Crankshaft #34991 in the new engine. The engine is equipped with a 3 amp Alternator #610977.

Customers may prefer the electric starter feature on above referenced engine, however, a 12 volt battery is required.

Model 911 serial number 0461 and below must have its engine replaced with a new engine. Repair parts are no longer available.

Use the following procedure for repairing Model 911 serial number 0462 and above.

Contact Tecumseh dealer. Purchase Short Block #752268 and Crank #34991. Replace crank as supplied in short block with Crank #34991.

Short Block #752268 does not include:

- Fly Wheel
- Magneto
- Carburetor
- Muffler
- Sheet Metal Shrouds and Covers
- Alternator

Attached, for reference, find Product Bulletin No. 128 Rewiring Instruction Specification 42-401

Note: To replace Model 911 Engines P/N 106391 as referenced above, Wire Kit P/N 112225 is required. Wire Kit P/N 112225 is available from Huck Manufacturing Co.

Wire Kit P/N 112225 includes:

Description	Part Number
Capacitor	505041
Mounting Clip	505042
Terminal	504140
Connector	502639
Alternator Lead Extension	112230

This Tool and Product Update replaces and obsoletes Product Bulletin No. 176.
