

Tool & Product Update

Model 226 Installation Tool Air Pressure Requirement Increased to 105-110 psi

The self contained Model 226 installation tool is designed to operate with up to 110 psi air pressure. The increased air pressure supply will assure the tools performance in 3/8" dia. MAGNA-GRIP and 3/8" dia. BOM industrial fastener applications.

The Pneudraulic Model 226 Tool now offers the capacity to install high pinbreak fasteners which previously required hydraulic installation tool/ Powerig combinations.
