

Products

Billet: We produce soft and hard alloy aluminum billet using modern casting and mold technology for extrusion, forging, and impact extrusion applications for use in many products and end markets.

Foundry: Our high-quality foundry products are used in automotive applications, cast-aluminum wheels and other products. Alcoa supplies primary foundry products in multiple shapes and numerous tailored chemistries to support your unique production needs.

Alcoa Specialty Alloys: Our constant pursuit of forward-thinking solutions has led to the creation of Alcoa Specialty Alloys, a new family of lightweight metals that defy conventional limits. SupraCast™, EZCast™, VersaCast® and EverCast™ offer higher strength and better thermal performance for new lightweighting solutions.

Rolling slab: Produced in a variety of alloy compositions and dimensions, rolling slab from Alcoa can be made into aluminum plate or sheet with varying thickness. Our technical experts work with customers to develop products that meet the stringent and constantly changing requirements of automotive, building and construction and other end-use markets.

Rod: Our facilities are equipped with state-of-the-art, fully-automated systems to produce the highest-quality rod to meet your needs, including both soft and hard alloy rod for electrical, mechanical and welding applications.

Aluminum Powder: Alcoa produces high quality fine and coarse aluminum powders, which serve a wide variety of applications such as aluminothermic reactions, chemicals, metallic pigments, refractories and solid rocket fuels.

Unalloyed high purity and P1020 ingot: Quality, dependability and service are represented in every ton of unalloyed high purity and P1020 aluminum ingot. These products are made with high quality bauxite and alumina, and come with our commitment to excellence in both customer service and on-time delivery.
