### **Alcoa Introduces SUSTANA™ Aluminum Product Line; Produced with Low Carbon Emissions and Recycled Content**

- *Product line featuring two key products, ECOLUM™ and ECODURA™, is well-positioned to meet customer demand for sustainable aluminum products*
- *Builds on Alcoa's long-standing commitment to sustainability*

**Dusseldorf, November 29, 2016** – Alcoa Corporation has launched SUSTANA™, a new aluminum product line produced with low carbon emissions and recycled content that is well-positioned to meet customer demand for sustainable aluminum products.

Unveiled at the ALUMINIUM 2016 trade show in Dusseldorf, Germany, which is taking place from Nov. 29 to Dec. 1, the new products are designed to help companies reduce the carbon intensity of their supply chain and achieve their sustainability goals.

The SUSTANA family includes two key products:

- **ECOLUM™** – a full range of cast products that are among the least carbon-intensive products available today, yielding a 75% lower carbon impact than the industry average. These products are produced at hydro-powered smelters that generate less than 2.5 metric tons (MT) of carbon dioxide per MT of aluminum. Alcoa provides certificates of origin that enable customers to verify the sustainability benefits when reporting on their own operations.
- **ECODURA™** – aluminum billets made from recycled content, ideal for customers seeking low-carbon materials for their products. Available in a variety of alloys and sizes, these products are made with a minimum of 50% recycled content and use up to 95% less energy to manufacture when compared to products with no recycled material. They also contribute to LEED and BREEAM certifications for sustainable building projects.

“Companies across a range of end markets have made sustainability a core business imperative, and as a result, they've prioritized the use of low-carbon aluminum products with proper certifications,” said Timothy D. Reyes, president of Alcoa Cast Products. “By introducing these eco-friendly SUSTANA products, which offer significant sustainability benefits when compared to

the industry average, Alcoa is underscoring its commitment to helping customers reduce their environmental footprint.”

“This global product launch also builds on our own long-standing commitment to sustainability which includes several noteworthy reductions in our own carbon footprint,” Reyes said.

For 15 years in a row, Alcoa Corporation’s former parent company, Alcoa Inc. (now renamed Arconic Inc.) has been named as one of the world’s leading companies for sustainability on the Dow Jones Sustainability Indices (DJSI) — a globally recognized and reputable benchmark for corporate responsibility and sustainability. The former Global Primary Products business of Alcoa Inc., which is now part of Alcoa Corporation, achieved a 31% reduction in greenhouse gas intensity from its 2005 baseline through 2015, exceeding a self-set 2020 target five years ahead of plan.

### **Dissemination of Company Information**

Alcoa Corporation intends to make future announcements regarding company developments and financial performance through its website at [www.alcoa.com](http://www.alcoa.com).

### **Forward-Looking Statements**

This press release contains statements that relate to future events and expectations and as such constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include those containing such words as “anticipates,” “believes,” “could,” “estimates,” “expects,” “forecasts,” “intends,” “may,” “outlook,” “plans,” “projects,” “seeks,” “sees,” “should,” “targets,” “will,” “would,” or other words of similar meaning. All statements that reflect the Company’s expectations, assumptions or projections about the future, other than statements of historical fact, are forward-looking statements. Forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties, and changes in circumstances that are difficult to predict.

Although the Company believes that the expectations reflected in any forward-looking statements are based on reasonable assumptions, it can give no assurance that these expectations will be attained and it is possible that actual results may differ materially from those indicated by these forward-looking statements due to a variety of risks and uncertainties. Additional information concerning factors that could cause actual results to differ materially from those projected in the forward-looking statements is contained in our filings with the Securities and Exchange Commission. The Company disclaims any obligation to update publicly any forward-looking statements, whether in response to new information, future events or otherwise, except as required by applicable law.
