

Information for Alcoa Customers

Dear Valued Alcoa Customer:

We are committed to product safety and to compliance with our obligations under REACH. Therefore, for Alcoa legal entities located outside of the European Economic Area (EEA), Alcoa has:

- Pre-registered substances that non-EEA Alcoa companies manufacture (aluminium, aluminium oxide, aluminium hydroxide, cryolite,) and the appropriate substances used by those companies to formulate mixtures, in order to benefit from the transitional periods provided by pre-registration under REACH.
- We are happy to inform you that, although not being a legal obligation, some non- EEA Alcoa legal entities have registered through an Only Representative aluminium, alumina and aluminium hydroxide by the first registration deadline (01.12.10)

For products manufactured outside the EEA, details of Alcoa's Only Representative are available upon written request through your Alcoa Commercial contact.

We are in the process of adapting our SDSs to CLP. Please note that most of Alcoa products do not require an SDS as per Article 31 of REACH; Alcoa is providing these SDSs voluntarily.

Alcoa is monitoring the substances on the candidate list, and their presence in our products.

If you have any question regarding Alcoa products and REACH, you can address your Alcoa Commercial contact or the Alcoa REACH Team at: REACHTeam@alcoa.com.
